

Perceive Recall Plan Perform (PRPP) Intervention Course

Chris Chapparo & Judy Ranka

Venue: Walkergate Park

Centre for Neurological Rehabilitation and Neuropsychiatry
Benfield Road
Newcastle upon Tyne, NE6 4QD

19th-23rd June 2020

The Perceive, Recall, Plan & Perform Intervention is designed for use by occupational therapists who have completed a PRPP Assessment course. The intervention approach aims to improve task performance mastery by addressing the specific cognitive strategy application behaviours identified through PRPP assessment as most impacting on mastery. Instructional methods used to address these behaviours incorporate cues and prompts that align with specific perceive, recall, plan and perform processing operations and preferences. The efficacy of this approach has been observed in children and adults with a variety of diagnoses and conditions that impact on everyday cognition, and demonstrated through research with adults with traumatic brain impairment and children with social and behavioural difficulties.

Cost: £700 (Lunch and beverages provided)

For further details or to apply, please contact: Doris Fischer, doris.fischer@ntw.nhs.uk,
Tel: 0191 287 5163. Please also refer to www.occupationalperformance.com for further
information on the PRPP Assessment.

How to find us:

Walkergate Park, Centre for Neurological Rehabilitation and Neuropsychiatry. Benfield Road, Newcastle upon Tyne, NE6 4QD. 0191 287 5000 (Main Reception)
